**DETAILED ACTION**

***Claim Rejections - 35 USC § 112***

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 9-13 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The claims are indefinite because it is not clear whether or not the receiving device is a part of the claimed apparatus.

Moreover, it is not clear from claim 9 whether or not referenced inner chambers are the same.

It is noted that upon clarification of the claims a restriction requirement between claims directed to a receiving device and a removing device could be made.

***Claim Rejections - 35 USC § 102***

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1-13 are rejected under 35 U.S.C. 102(b) as being anticipated by James (US Patent No 4,717,510).

James teaches an apparatus as claimed. See entire document, especially Figs.

1, 2 and 4 and the related description.

Art Unit: 1746

The apparatus comprises a receiving device (10) with a plate (11) and a removing device (15). These devices meet all claimed limitations.

The apparatus is designed for waste management and is capable of performing the claimed functions.

### ***Conclusion***

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. US Patents 3,016,463, 3,347,403, 4,594,214, 4,610,839, 4,626,380, 4,673,813, 4,673,814, 4,728,136, 4,996,019 and 5,059,635 are cited to show the state of the prior art with respect to the containers and arrangements for radioactive waste management.
